## Dangers in That Cough

Beware of Sneezers and People With Ugly Coughs and Colds. Use this Preventative.

## TAKE GOOD TONIC TO WARD OFF COLDS, COUGHS

Beware of that dangerous cough! Stay away from sneezers and people with colds and coughs, and red, inflamed eyes. Your system when the least bit rundown or weakened by overwork, worry, or abuses of modern day life, is subject to all kinds of dangers.

Don't tolerate a cold or cough a moment. No member of a family should be permitted first of all to become weakened and susceptible to colds and coughs, but if they catch cold, stop it quickly. Take Earle's Hypo-Cod. Hypo-Cod is a good system tonic and strengthener as well, and a bottle taken now to strengthen the system, enrich the blood and improve the vitality, is a wise precaution.

Hypo-Cod contains hypophosphites, wild cherry bark, cod liver oil, sherry wine, malt extract and iron. It is so pleasant to take, even the children like it. Give children half doses. It makes them grow fat and rosy, keeps colds and coughs away. Elderly folks find it agrees with the weakest stomach.

Get the genuine, bearing the name Earle Chemical Co. Sold in Medina by J. W. Tuttle, and in Seville by B. E. Hartman.—adv.

## ECLIPSE

This stove is made right to Government orders. All cast iron and will last for many years. Perfectly smooth finish. See the saving in labor keeping it clean. Hot blast fire-pot. Burns all the gases, thus saving a large amount of fuel. Has sliding oven damper, so you can heat your oven to any temperature desired. See the saving?

In other stoves your oven damper is either OPEN or SHUT, and if your oven is too hot, open the door and let the heat go.

The Hot-All-Over-Top is what gets the cook. You can cook on all six lids without heating the oven. This increases the cooking capacity one-third with the same amount of fuel, and look at the time saved in getting a big meal. That is what you are looking for—something to save money and labor.

All we ask is that you come in and see it.
